The presence of allergen substances according to Reg. 1223/2009/EC and Dir.2003/15/EC in cosmetic products should be indicated on the label of the customer's finished product to inform the consumer when it exceeds the following limits:

0.001% for rinsing products (leave-on)

0.01% for rinse-off products and for products intended for detergency.

The products may contain traces of allergens derived from the production processes of raw materials but that the percentage of use on the finished product are within the limits indicated by the regulation in force and are not to be declared. The declared concentrations are calculated and do not replace the chromatographic quantifications of the individual lots.

The IFRA standards related to restrictions of use are based upon security assessments of the experts of the Research Group for perfume materials (RIFM) and are implemented by the IFRA Scientific Committee.

This Certificate provides restrictions for use of the specified product based only on those materials restricted by IFRA Standards for the toxicity endpoint(s) described in each Standard.

This Certificate does not provide certification of a comprehensive safety assessment of all product constituents. It is the ultimate responsibility of the customer to ensure the safety of the his own final product by further testing if need be.
